

THE ADVOCATE.

CATTLE AND DAIRY NOTES.

Good feeders are eagerly inquired after.

Montana's sales of cattle this year amounts to \$7,000,000 or \$8,000,000.

When the milk is drawn, take it out of the stable or cow yard at once.

The cow appreciates a comfortable place in winter and so does the milker.

The Cherokee Strip is now free cattle, except those belonging to the Cherokees.

If milk is contaminated bad butter and cheese must be the result. Hence the necessity of cleanliness.

Where roots have been fed for years, the silo has not yet got a foothold. Roots will do, to say the least.

The Home, Land & Cattle Co., of St. Louis recently 338 head of 1,142 pound wintered Texas cattle at \$4.25.

There is no profit in breeding a blue-blooded calf and then allowing it to forage around a straw stack all winter.

A cow that jumps fences needs attention, but not as much in the way of pokes, blinders, knee bands, etc., as plenty of food.

And now there is a chance for our hogs in Austria. On with the gate openings, let the great American porker be unconfined!

Don't spare the knife on any animal that will have a tendency to lower the standard of your herd rather than to improve it.

While it is best always to push the fattening, there is nothing gained by feeding stock at any time, more than they will eat up clean.

A cow that cares nothing for ordinary fences is a nuisance, while the corn field holds out much better promises than the cow pasture.

All along the line of production the principle will hold good that quality governs price and that profit is found only in producing the best.

The question of "dehorning" cattle is greatly agitated among stockyard men, ranchmen, and all who have charge of the animals in life.

Somebody talks of scrub feed. Timely, exceedingly timely. Scrub feed has made many a scrub cow scrubtier than she need to have been.

A bunch of steers that are all about the same size and color, catch the eye of a dealer much more readily than if the animals are of all sizes and colors.

Market the scrub bull this fall, and arrange to commence breeding with a pure-bred of some of the better breeds. Scrub hogs, cattle or horses do not pay.

It is the caseine left in the butter that causes it to sour and spoil. Remove all of the caseine and pure butter will keep sweet and fresh indefinitely, if protected from the air.

Choice beef cattle that are considerably above the average quality can always be sold at a very good price a short time before the holidays. But they must be in prime condition.

The cow that the farmer wants is one that will yield him a good profit with ordinary care. He has no disposition to put a cow to bed and tuck her in, or to feed it on gruel.

The man who complains that his cows are unruly can safely be set down as a poor farmer, and very often he is a cruel one, who deserves punishment. Most unruly cows are made so by hunger.

One good and effectual remedy to remove warts is to wait until she is dry, then wash them thoroughly with a solution of sal ammoniac and camphor; before she becomes fresh they will have entirely disappeared.

There will be a vast deal of cattle feeding done on a small scale in Nebraska and Kansas this fall and winter. Every farmer who can fatten them from five to one hundred steers will be hunting for feeders. So says the Northwestern Stock Journal.

It is easy enough to make any human man's heart ache to note how the average farmer raises his calves; not one calf in a hundred has a fair chance for itself, says Hoard's Dairyman. The burning sun on their tender, thin skins, tormented with flies, given no food whatever that their baby stomach can digest and assimilate, they advertise the stupid inhumanity of the owner.

Shiftless Tricks for a Farmer.

To plant more acres than can be taken care of.

To work with poor tools and to sow poor seed.

To buy at public sales what is not needed, because it sells cheap.

It is shiftless to keep poor stock. A poor cow eats as much as a good one.

To allow the hogs and sheep to wander at their own sweet will over their owner's and his neighbor's premises.

To let the cattle fodder themselves at the haystack. It saves a little labor, but the waste will make their owner poor.

To leave tools of any kind lying out in the weather; to put them away uncleaned, or to loan them to shiftless or careless neighbors.

To turn the cattle out into the bare fields in cold weather when there is nothing for them to eat there, and they lose flesh shivering in the cold.

It is shiftless to allow weeds to occupy any portion of the farm, and very shiftless to allow bushes to occupy several rods of ground along the fence rows.

To plant an orchard and then to allow cattle to browse the trees; to leave vacant places in a young orchard; to allow a young orchard to remain in grass.

To wade through mud to the barn and outbuildings when good dry paths can so easily be made. To pay heavy doctor's bills for wife and children because their feet became wet through lack of good paths.

To have no garden and to buy stale vegetables of a huckster. It is nearly as bad to have a miserable little garden, which the good wife and girl painfully weed, and secure a few stunted vegetables, when large crops could be had with little trouble, if the garden was cultivated by horse power.—[G. G. Groff, in American Agriculturist.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise.—A purer medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum and other affections caused by impure blood.—Will drive malaria from the system and prevent as well as cure all malarial fevers.—For cure of headache, constipation and indigestion try Electric Bitters.—Entire satisfaction guaranteed or money refunded.—Price 50 cts. and \$1.00 a bottle at W. S. Lloyd's drug store.

One of the commonest and most stupid faults seen in stock raising is the semi-starvation of young animals, particularly calves and colts. With good care their growth is more cheaply obtained than at any other time of life, and young animals are almost sure, with ignorant farmers, to be raised on a diet that prematurely dwarfs them for life.

Merit Wins.

We desire to say to our citizens, that for years we have been selling Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell as well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price, is satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. W. S. Lloyd, druggist.

A new terror of courtship has been developed at Anderson, Ind., in the case of Miss Emma Bowers, a winsome brunette. For some days she has suffered from a supposed attack of pleurisy, but when Dr. S. F. Bordman was called in he found that one of the young lady's ribs was broken. After much questioning, the girl blushing admitted that her best beau, George Gerrick, had inflicted the injury while giving her his usual tender embrace before parting last Friday night.

At this season of the year people can not be too careful about keeping their bowels regular. Bilious and malarial diseases are often brought on by allowing the bowels to become torpid. An occasional dose of St. Patrick's Pills is all that would be required, and might prevent serious sickness. For sale by T. G. Julian.
